Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 1-12 are pending for examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US2003/0060425 A1 ('425) in view of Field (Virology, page 26-27, Lippincott-Raven, 1996).

'425 teaches androgenic steroidal compounds, encompassing the herein claimed active, useful in treating viral infections (See the abstract and paragraph [0825]). '425 also teaches the dosage regimen of the androgenic compounds as multiple dosages daily from 5 to 1000mg daily (See claims 25 and 31).

'425 does not expressly teach the androgenic compounds useful in treating HPV infection. '425 does not expressly teach the herein claimed dosage regimen.

Field teaches the common viral pathogens including papillomavirus, in human (See Table 4 in page 26-27).

It would have been obvious for one of ordinary skill in the art at the time the invention was made to administer the instant compounds for the treatment of HPV infection.

Art Unit: 1617

One of ordinary skill in the art would have been motivated to administer the instant compounds for the treatment of HPV infection. The compounds of '425 are known to be effective in treating viral infections and increasing immunologic response in the body, broadly. It is therefore reasonable to expect the very same compounds, including methyltestosterone, to be useful in treating any viral infections including those caused by HPV since, based on Field, HPV is known to be pathogenic to human.
